Modern and practical solutions for your home

Sliding door systems are an elegant and functional way to maximize space while giving your interior a modern look. We offer a wide range of door systems to suit different needs and styles.

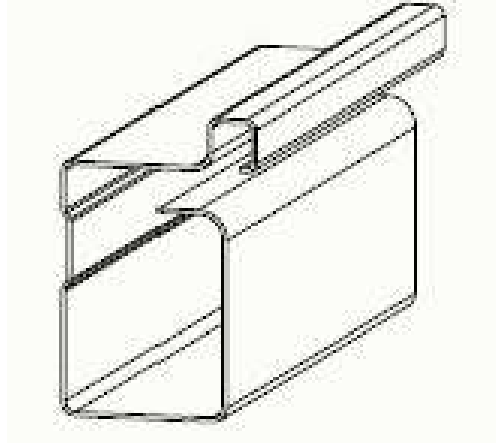

We will make sliding doors exactly according to your specifications and we will adapt them to your needs and wishes.

We offer the option of ordering a system of steel or aluminum profiles for sliding doors.

[Non-binding request](#)

MONTREAL system of steel profiles for cabinets with sliding doors

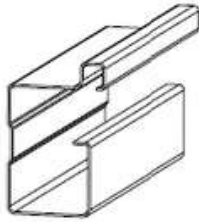

Montreal is the standard for the system of steel profiles for wardrobes with sliding doors. The system consists of individual parts that you can [inquire](#) about, order and purchase from us.

All profiles are made of painted steel strips or steel strips laminated with PVC. Depending on the type of profiles, we can use a 10 mm furniture board or a 4 mm glass and mirror board for the production of sliding doors

We offer steel profiles in decors

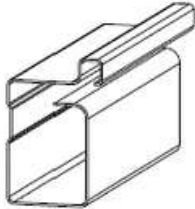

**The following types of Montreal
brand steel profiles are
available in our offer**

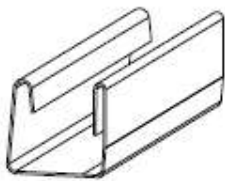

vertical steel profile for filling 10 mm
